

## Good Energy Summit

Vis (Croatia), May 2 to May 5, 2018

Dear Guest,

on behalf of Green Energy Cooperative and our partners, we would like to invite you to the **Good Energy Summit** which will be held on **Island Vis from May 2 to May 5, 2018**.

The Good Energy Summit is third in the row of our thematic events, after Krk in 2014 and Kaštel Lukšić in 2016, intended for everyone who views the development of renewable energy sources as a chance to develop local communities and create a positive change in the society. Good energy encompasses new economic models and practices that through ownership and use of renewable energy sources improve quality of life in local communities and are based on the principles of fairness, democracy and concern for people and the environment.

We are inviting over 80 local and European experts, researchers, practitioners, decision-makers, social entrepreneurs, innovators, activists and enthusiasts who deal with community energy, energy communities and energy poverty from different backgrounds, all sharing the same goal: bringing positive changes in the society.

**You are one of them - and we greatly appreciate your participation in this event!**

MAIN ORGANIZER: Green Energy Cooperative

CONFIRMED GUESTS: REScoop.eu, Energy Cities, Energy4All, Robin Hood Energy, Caritas Germany, Transnational Institute, Focus, Greenpeace, UNDP Serbia, GIZ Serbia, International Renewable Energy Agency and many others.

## PROGRAM

In three and a half days you will be able to take part in more than 30 lectures and panel discussions, share experiences and inspire other people who have dared to approach various environmental, climate, social and political challenges in an innovative way.

We will talk together about various models of good energy and the possibilities of adjusting them in our frameworks.

The topics we cover through panel discussions and lectures are:

- Models of citizen participation in ownership of renewable energy sources
- Development of community energy models in Croatia and the Western Balkan region
- Development of energy communities in cities, islands and rural areas
- Green energy as a public good
- Models for fighting energy poverty
- Mediterranean biomass

## PITCHING GOOD ENERGY PROJECTS

More than 10 successful projects of cities, municipalities and energy cooperatives will be presented at the conference as the best projects of good energy.

## PARTNERS AND SUPPORTERS

Partners and supporters are representing numerous domestic and international organizations such as Association of Cities in Croatia, Energy Cities, REScoop.eu, the Institute for Political Ecology, Faculty of Geotechnical Engineering, Greenpeace and Renewable Energy Sources Croatia (GIU OIE).

The event is organized within the project **"Good energy in Social Entrepreneurship"** implemented by Green Energy Cooperative in collaboration with Craft College and funded by the European Social Fund. Also, a workshop will be held as part of the Biomassud Plus project financed by the EU programme Horizon 2020 "How to develop a Mediterranean biomass market" project.

## REGISTER

If you haven't registered yet, please fill out the online [registration form](#).

The event will be held in the city of Vis, in **Hrvatski dom**. Participants arrival is scheduled for May 1. The conference is free of charge, and we can provide financial support in covering travel expenses and accommodation if needed. Please also note that the working language of the event will be Croatian, with translation to English.

**We are looking forward to seeing you on Vis!**

Zoran Kordić,

Green Energy Cooperative Manager
